

## Intubation Consensus Statement Update & Consultation

Following analysis of the responses to the Intubation Consensus Statement Consultation in September 2017 it was decided to undertake a *Rapid Evidence Review*. The findings from this *Rapid Evidence Review* have been incorporated into the Intubation Consensus Statement and it is now released for a second consultation period to allow wider review of the available evidence and to allow further opportunity to comment. This consultation will run for approximately 28 days and close on the **11th March 2018**. At which point the statement will be reviewed again by the [working group](#) and prepared for final publication in Spring 2018. The amended [draft Intubation Consensus Statement and Rapid Evidence Review are available to download](#). Should you wish to formally respond and contribute to the final review stage in this process please email [consultation@collegeofparamedics.co.uk](mailto:consultation@collegeofparamedics.co.uk) with your comments.

*Liz Harris, Executive Officer.*
